

giroflex 64

The ergonomic Swiss classic

giroflex
designed to work

The Ergonomic Swiss Classic

The giroflex 64 is a true icon of the Giroflex brand.

Captivating geometric lines with purpose, high quality precision engineering, and ergonomic excellence. The giroflex 64 is designed to work for you. Forever.

Recognised for enhancing the health and well-being of users, the giroflex 64 seamlessly blends purposeful curves, with its unique, industry-leading synchro-motion mechanism. Synchro-motion allow the giroflex 64 to move in-sync with your natural body-movements, offering effortless comfort and support throughout your working day.

New for 2024!

An updated textile collection for the giroflex 64, carefully curated for modern spaces and easy integration with other Flokk designs.

Read more on **Pages 14-17** or visit *our website* to explore the collection today.

Synchro Motion

Designed to work -
with natural movement

Driving the performance of the giroflex 64 is our patented synchro-motion mechanism.

Synchro-motion operates by seamlessly following your natural movements, providing individual tilt angles for both the chair seat and backrest. This ensures that the seat and backrest move in perfect harmony with your body during recline.

*Read more about
synchro motion*

The giroflex 64 also features a dual seat zone, a specially developed profile which increases the pressure transferred into the feet, reducing pressure on the thighs and back. Together, these ergonomic features prevent pressure points or sheer that may cause discomfort or pain, as well as promoting better blood circulation.

Every aspect of the giroflex 64 can easily be adjusted including the seat height and depth, armrest height and depth, as well as a range of different back heights for individual preferences and needs.

The result: an energetic experience of comfort and sustained focus, even after longer periods, supporting your long term health and vitality.

giroflex 64

Designed to work –
in every workspace

The giroflex 64 effortlessly embodies versatility, offered in five base models – Standard, Executive, Cashier, Laboratory, and 24h – each customisable to cater to various environments and individual needs.

Every model delivers consistent ergonomic support through the integrated synchro-motion mechanism. Different models are specifically configured with distinct back-rests, seat widths, and heights, carefully chosen for particular tasks.

Further customisation is easy, allowing you to personalise your chair with a selection of headrests and armrests to suit specific preferences, along with an extensive range of fabrics and materials for upholstering the chair exactly to your liking.

Spare parts for the giroflex 64 are readily available to ensure its longevity. Our dedicated service teams are on standby for any assistance you may require.

giroflex 64

Designed to work –
for a long life

Since its foundation in 1872, high quality has been an enduring hallmark of Giroflex, a trait exemplified in the giroflex 64.

Precision engineering, premium material choices and meticulous design has resulted in a chair that lasts, providing continuous daily comfort and support to millions of worldwide users since launching in 1998.

Designed for disassembly, any components which do wear out can be easily repaired or replaced, making it a chair that could potentially last forever.

Made using 49% recycled materials, the environmental impact of the giroflex 64 is also significantly reduced, helping purchasers lower the environmental impact of their own workspace.

*Learn more about taking care
for a longer product life [here](#).*

EPD (Environmental Product Declaration) certified, we also provide a completely transparent, 3rd party verified account of the materials and energy used during manufacture, and the overall carbon footprint of each chair. The giroflex 64 is also GREENGUARD Gold certified, ensuring that it contributes to a cleaner indoor environment.

Spare parts are available if needed for any reason, especially to support the longevity of our giroflex 64. Our *pricelist* gives you an overview of the most important items, and our service teams are always available if you need any assistance.

giroflex 64

Designed to work -
in new colours and materials

A thoughtfully curated assortment of fabrics and materials is now accessible in our standard textile collection for the giroflex 64, presenting an appealing range of designs suitable for contemporary spaces, be it at home or in the office.

This new selection also enhances the overall coherence of the Giroflex range within the broader Flokk portfolio, making it easier for our customers to include the giroflex 64 within a comprehensive seating solution throughout your entire workplace.

Every fabric has undergone careful testing and selection by our in-house specialist, prioritising key qualities such as durability, sustainability, comfort, pleasing tactility and appearance.

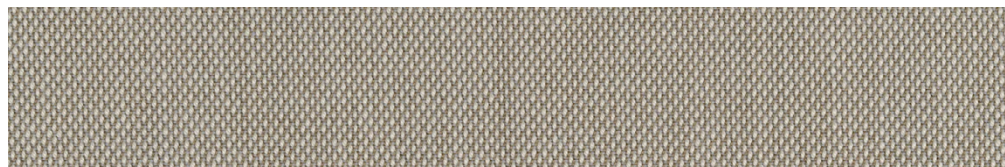

The choice of material has always been taken very seriously in Giroflex, from the first days of the brand's life, starting with the founder Albert Stoll I. Albert Stoll was known to personally quality check, assess and reassess the choices made, to ensure a high level set for the brand in long life as well as customer experience.

Natural tones of wellness

The lightness of beige creates a serene and calm mood. Bringing in cues of nature, it contains the ability to melt into and blend in with surrounding colours, adding lightness and a feeling of wellbeing to the environment it sits in.

Back and seat colour

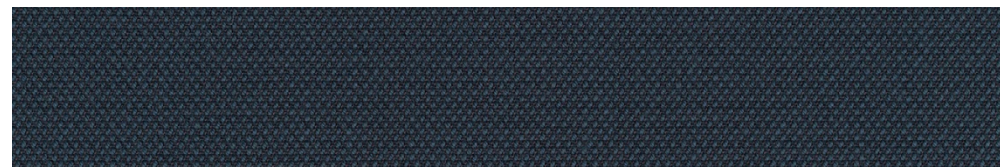

Light beige STT213
Kvadrat Steelcut 3

Mindful purpose in blue

A wide range of blue creates a spirit of clarity along with a freshness that comes with the reference of crisp glaziers, sky and deep lakes in Switzerland.

giroflex 64

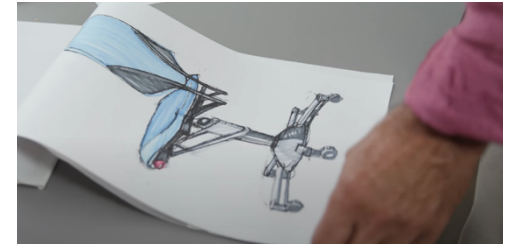

Designed to work -
By Paolo Fancelli

In 1998, Giroflex introduced a design that would become an iconic classic within their history of swivel chairs—the giroflex 64. Swiftly acclaimed as Switzerland's premier ergonomic chair, it was crafted by Paolo Fancelli, then associated with the Walser Design Studio.

Paolo Fancelli, a renowned Swiss designer, embarked on this project as part of a competition at the end of 1995. Immersed in his profound connection and admiration for nature's beautiful lines, Fancelli sought to create a chair with a timeless design that would also enhance the well-being of its users ergonomically. In a 2008 interview, Paolo emphasised the significance of providing high-quality solutions in product design, extending this philosophy to every aspect, right through to the end-user.

"When I design products, it is important to me to find high-quality answers to a question."

Fancelli

Fancelli's visual approach leans towards slight curvature rather than straight lines. The chair's curves are meticulously designed to seamlessly accommodate the user's body, creating a snug fit when seated. The philosophy underlying this design transcends fleeting trends, focusing on minimalism, and making the connections between the chair's support points and the floor evident.

"I love to not have to make concessions to trends, that one can be between south and north, not to strongly influenced by this or that way of life."

Fancelli

Paolo believes that the success of the giroflex 64 lies in its intuitive design, enabling people to identify with the chair regardless of their age, gender, shape, or size.
