

HÅG

HÅG Celi

HÅG Celi

HÅG Celi supports well-being and focus through its built-in rocking motion, encouraging subtle, continuous movement that keeps the body engaged. As part of the active seating movement, it pairs this dynamic comfort with a strong sustainability story, using 94% recycled plastic and 75% recycled aluminum.

The result is a uniquely sustainable stacking chair, comprising more than 80% post-consumer recycled materials, designed for disassembly, with energy efficient production. HÅG Celi enhances every space while reducing its impact on the planet.

HÅG Celi

Effortlessly Social

HÅG Celi blends modern design with smart functionality for social and collaborative spaces. Lightweight, comfortable, and easy to stack—up to 12 upholstered or 15 non-upholstered—HÅG Celi delivers flexibility with efficient storage.

Sustainable by Design

A standout feature of HÅG Celi is its exceptional sustainability. Made from over 80% post-consumer recycled materials, it transforms waste into a valuable resource while supporting a circular economy and reducing environmental impact.

Snow Plough Edition

Now available—a bold expression of circular design. Made using damaged snow plough markers collected from Norway's mountain roads, this edition turns discarded plastic into high-performance seating.

With its contemporary design and eco-conscious construction, it's an ideal choice for today's spaces where form and function align with a commitment to the planet.

Certifications

BIFMA LEVEL® 3 Certification
GREENGUARD Gold Certification

We had high expectations when looking for furniture. Where we specified the HÅG Celi, we needed seating comfortable for a guest to sit for a couple of hours or potentially a full day. It had to look attractive, and of the highest quality that we feel matches the Abbey Road brand. It's so important that we make these considered and thoughtful decisions to ensure we create a space where artists, producers, musicians, and students are able to create great art.

Hannah Fitzgerald

Global Head of Marketing, Abbey Road Institute, London

Movement is the mission

At HÅG, we believe sitting shouldn't mean staying still. Since 1943, we've designed chairs that support the way our bodies are meant to move—naturally, continuously, and effortlessly.

Our signature innovation, HÅG inBalance®, enables gentle, balanced tilting that follows your body's movements without manual adjustments. This creates a dynamic sitting experience that keeps you more alert, energized, and comfortable throughout the day.

We pioneered the concept of dynamic ergonomics, designing chairs that encourage frequent posture shifts, improve circulation, and support active sitting. HÅG redefines what it means to sit well: healthier, more conscious, and always in motion.
