PRODUCT INFORMATION

The sound absorber Thelma is named after Pauline Deltour's youngest daughter, a name that is said to mean 'divine protection'. "It has a stylized simplicity with fabrics that are wrapped around it and create a tailored and elegant expression. At the same time, I'm struck by the light-hearted playfulness that the sound absorber expresses; it feels self-conscious and urban, but at the same time relaxed and unforced," says Tobias Strålman, Design lead at Offecct.

Since our offices and ways of working have changed, towards increased flexibility and more but smaller spaces for physical and digital meetings. Thelma sound absorber are designed for use in such soft, adaptable work spaces – and also come with smart accessories such as a hook.
