RH ACTIV

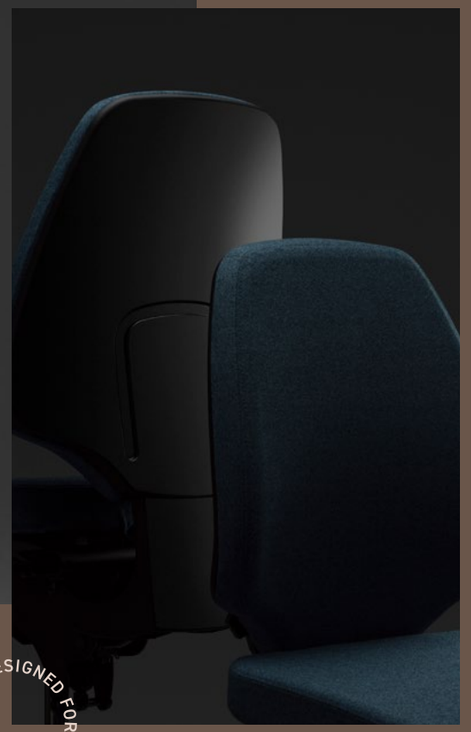

RH ACTIV

RH Activ is ideal for use at checkout counters, educational applications, shop environments and assembly lines or just for everyday all-purpose use. We offer affordable and high quality chairs for demanding environments. Please check out our large selection of various options. Contact us and we will assist you in finding exactly what you are looking for.

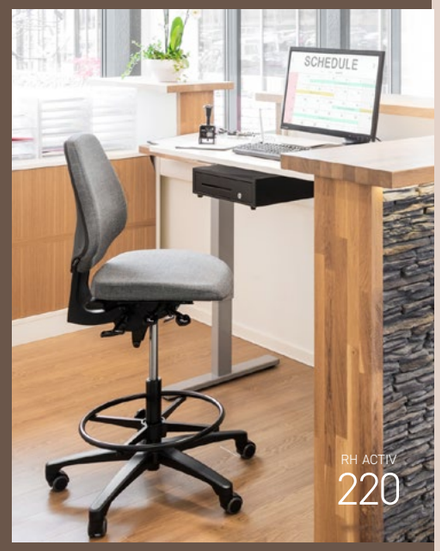

DESIGNED FOR HUMAN PERFORMANCE •

How and where we work has changed a lot over the years. Today's offices needs to be efficient, flexible and adaptable, that's why RH Activ is perfect for all types of work areas. RH Activ is easily adaptable for work in the office, project rooms, touchdown areas, education and even for your home office.

RH Activ 300 is designed to fit in to demanding environments like industry, laboratories, and cashier desks. Featuring a unique back solution, it can be folded down to easily slide under any desk, a design perfect for narrow spaced workplaces where people shift between seated and standing working positions.

RH Activ is also suitable for cashier areas. Additional options, including an extra thick seat, reinforced back & seat pads, and a foot ring, make RH Activ suitable for sit-stand seating at cashier desks in stores as well as for receptions.

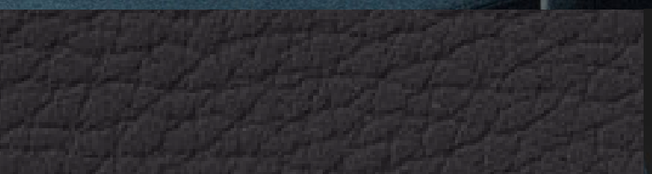

HOW THE RH ACTIV WORKS

DESIGNED FOR HUMAN PERFORMANCE •

LABORATORY, CLEANROOM, ESD

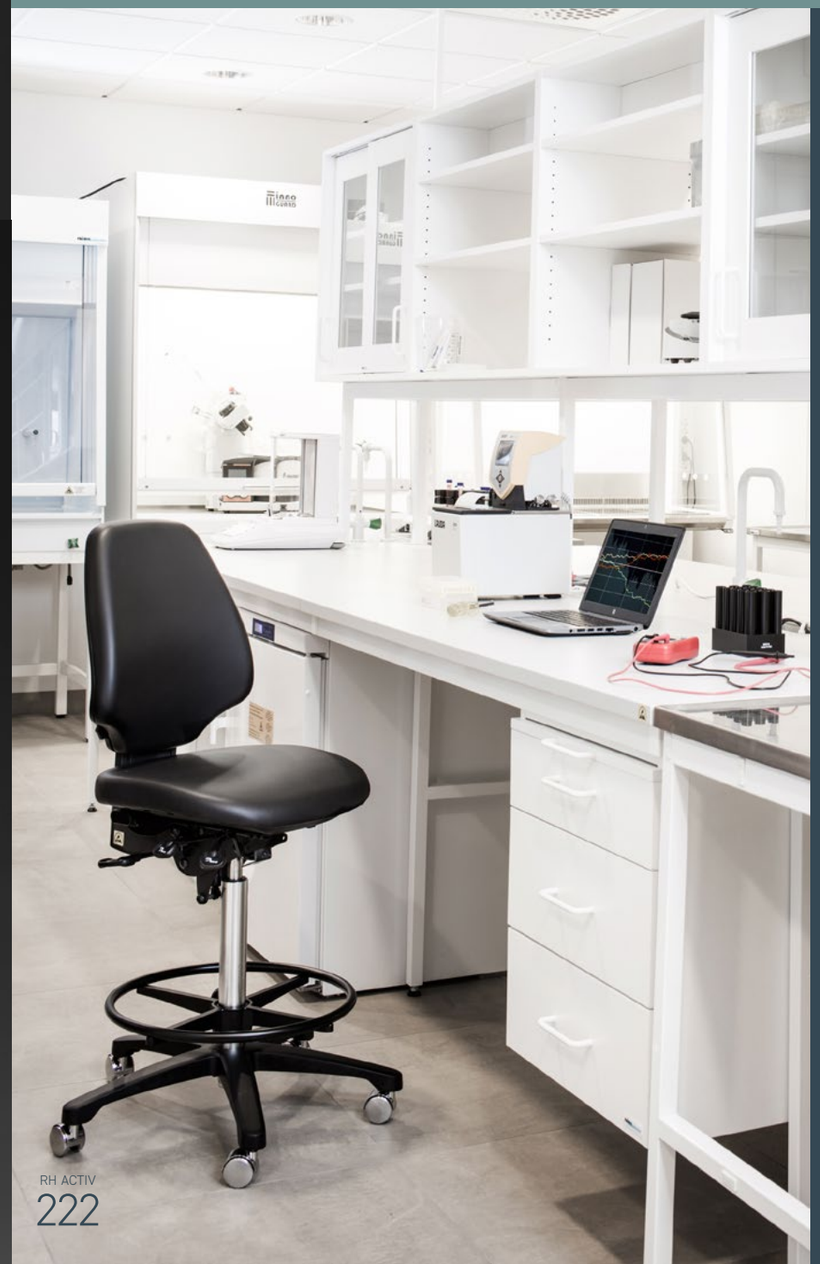

We offer a wide range of fabrics for environments with special requirements

The health-care sector has high demands of performance and the work areas must be well suited for the tasks. The different environments within healthcare require different seating and RH Activ solves this with its unique range of adaptions. The chair is easy to clean or sanitize and it´s perfect for areas with multiusers.

RH ACTIV
222

RH Activ cover all requirements for laboratory seating and meet the ergonomic needs of laboratory workplaces. The chair is engineered to help users stay productive and alert throughout the day. RH Activ is available upholstered with fully washable antibacterial/ antimicrobial vinyl.

Our Cleanroom chairs meet environmental pollutant requirements with regard to, e.g., dust, airborne microbes, aerosol particles, and chemical gases. We also offer chairs that are adapted for a combination of ESD and cleanroom environments. RH Activ Cleanroom is upholstered with conductive vinyl.

Our ESD chairs are certified and approved for work environments requiring antistatic protection for areas with sensitive electronic equipment found in clean rooms and laboratories. RH Activ ESD effectively diverts static electricity through the back, seat, gas lift down to the floor. The fabric on the chair is designed to conduct static electricity.

We build chairs to withstand everyday use and to last for a long time. Before they leave our factory, they undergo rigorous quality control. This enables us to provide a full ten-year guarantee, so that you can feel completely secure with your purchase.

10 YEAR GUARANTEE

DESIGNED FOR LONG-TERM USE

RH Activ is designed with replaceable components to make maintenance and repair easier. The seat and back pads can be replaced when needed, rather than replacing the entire chair. The chair is also designed for disassembly, making it easier to separate components and materials for reuse or recycling where appropriate.

CERTIFICATES

- EN 1335
- MÖBELFAKTA
- EPD, ISO 14025
- GREENGUARD GOLD
- IEC 61340 (ESD)

The RH Activ is versatile in more ways than one. Choose between two back and seat sizes and a wide range of colors and fabrics – you might come up with a unique combination. Bases and castors are also available in different colors and materials.

Configure your own RH Activ **store.flokk.com/norway/en-gb/products/rh-activ**
