

DESIGNED FOR HUMAN PERFORMANCE

RH Axia Exclusive

An RH chair is the perfect work tool, a chair that puts you in an optimal position all day, every day. A few simple adjustments is all it takes to make your RH chair fit your individual anatomy. Our chairs are designed with the human in focus to increase daily performance and wellbeing and to meet every user's individual need.

Ergonomics

- RH Axia Exclusive is characterised by its movement of the chair: the back rest and seat move together at a fixed angle, ensuring proper pelvic support thanks to the interaction between the support points in the back rest and seat.
- "Split seat" design: feet can stay stable on the ground, while moving the chair. the seat tilts at 1/3 of the front, meaning the front part remains in a slight forward tilt while the back-part tilts backward. this avoids the user from sliding off the seat when leaning backwards.
- The RH Axia Exclusive has an easily adjustable weight setting. Allows the chair to be quickly adjusted with exactly the right counter-pressure so that the chair flawlessly follows the user when sitting actively.
- The backrest shape is designed to allow "free shoulder space" and movement. Separately adjustable back angle. Always the right and constant support for the back. Lumbar pump is available as an option for extra support.
- Ergonomically shaped seat cushion with 10 cm sliding seat adjustment.
- The armrests are uniquely designed to stay fixed in position when the seat and back move simultaneously. Allows the user to move in their seat without having to pull their hands from working position.
- The Axia 2.0 series offers 2 mechanism options:
A = Axia standard chair mechanism for individual seat height, back angle and seat angle adjustment.
B = the chair mechanism with only seat height and seat angle adjustment.
- The adjustments can be operated from 2 sides. All controls are located for easily access with picograms guiding the functions. Functions that need to be changed during work, these controls are placed on both the left and right sides.
- The modular design of the Axia 2.0 makes it possible to create an office chair that meets all the ergonomic requirements of the user.
- Interchangeable seat and back, easy to click on/off system. Expands the lifespan of the chair.

Quality

- 10 year guarantee
Flokk provides a 10 year warranty for all RH chairs that are used under normal conditions for up to 9 hours per day.

Flokk is certified in accordance to:

- ISO 9001
- ISO 14001

RH Axia Exclusive is certified in accordance to:

- Testing in process

Environment

- Supports Flokk environmental profile
- Easy to disassemble and no harmful chemicals

Design

Materials and surfaces communicating comfort and wellbeing through bodyfitting forms.

Fire classifications

Foams and standard fabrics are tested to BS/EN 1021-1&2 (cigarette & match). Foam and fabric according to BS-5852 ignition source 5 (crib 5) can be delivered on request. Please contact our customer service for further information.

Maintenance

Vacuum clean the chair with a furniture brush or wipe it with a clean cloth or sponge slightly dampened with lukewarm clean water. Do not remove any plastic parts or attempt to open the seating mechanism. Contact your Flokk dealer if the chair requires servicing or maintenance.
